Turned my hands on process into some
gifs.

The scribbling of words indicates that you
don't need to read all of them but at the
same time the scribbling is quite
distracting. It detracts from what matters,
which is the sentence that is left to be
read.

A system and method for determining a mood for a crowd is disclosed. In example embodiments, a method includes identifying an event that includes two or more attendees, receiving at least one indicator representing emotions of attendees, determining a numerical value for each of the indicators, and aggregating the numerical values to determine an aggregate mood of the attendees of the event.

These posters show the posters without the movement of scribbling on loop.

This way people are more inclined to read the sentence left but still the scribbles are quite distracting.

A system and method for determining a mood for a crowd is disclosed.

The system and method includes an event that includes two or more attendees, at least one emotion, a numerical value for each emotion, and an aggregate mood of the attendees of the event.

A system and method for determining a mood for a crowd is disclosed.

The system and method includes an event that includes two or more attendees, at least one emotion, a numerical value for each emotion, and an aggregate mood of the attendees of the event.
